DETAILED ACTION

Response to Amendment

1. This action is in response to amendment filed October 16th, 2003.

REASONS FOR ALLOWANCE

2. Claims 39-57 are allowable over the prior art.
3. The following is an examiner's statement of reasons for allowance:

With respect to claims 39 & 57, Komine 6,404,784 B2 discloses a phase control system as illustrated in Figure 5. Komine shows a master oscillator that provides a first beam of electromagnetic energy in the form of a reference wave that is not amplified. Komine shows the first means to detect an aberration with the photodiode array sensor or camera, the second means responsive to error signal for providing a conjugate correction signal in the form of a processor and AO controller, the third means responsive to the correction signal to provide an amplifier distorted reference beam in the form of an adaptive optic (AO), and the fourth means including an amplifier to amplify the predistorted reference beam. However, Komine does not disclose nor suggest the fifth means for conjugating the amplifier distorted reference beam. As a result, independent claims 39 & 57 and dependent claims 40-56 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
